EDUCATION

Dr Dy Patil College of Engineering Pune   **01 2020 − Current**
*B.E - **CGPA** - **9.6***   *Pune, India*

Experience

Matlync ↗   **09 2022 − 11 2022**
Flutter Developer Intern   *Coimbatore, India*

- Optimized the user interface by implementing significant improvements and meticulously resolving any encountered bugs within the codebase.
- Streamlined user authentication process via successful integration of an authentication system utilizing Google Sign-In; reduced login wait time by 50% and increased user satisfaction by 20%
- I successfully registered the app on the Google Cloud Platform, enabling its presence on the Google Play Store. This strategic step strengthened its visibility and extended its reach to a broader audience.
- Methodically incorporated essential components under the guidance of experienced mentors, adhering closely to their recommendations and instructions to ensure optimal functionality and maintain code quality.

Easyops ↗   **02 2023 − 03 2023**
Software Developer Intern   *Banglore, India*

- I actively engaged in daily stand-up meetings and consistently attended all scheduled meetings.
- I actively engaged in the project under the guidance and mentorship of senior members, leveraging their expertise and insights.
- I fostered effective collaboration within the team, actively leveraging version control tools to streamline our workflow and ensure seamless coordination of efforts.
- I leveraged Jira software to proficiently manage tasks, optimizing organization, prioritization, and collaboration. This enriched overall project productivity.

PROJECTS

Codeforces Visualizer ↗ |

- This application offers comprehensive user details from the Codeforces platform, including ratings and visual graphs to track rating changes effectively..
- Notably, it has garnered significant success, surpassing 100 downloads on the Play Store..

Ecommerce Site ↗ |

- This robust MERN application utilizes MongoDB, Express.js, React.js, and Node.js to create a full-stack architecture, seamlessly integrating front-end and back-end components.
- The application features an intuitive admin dashboard that enables efficient product management, ensuring streamlined control over various aspects of the system.

AttainDI ↗ |

- Originally a college-level project, this software has evolved into a commercially viable product, demonstrating its successful transition.
- With copyright protection in place, the software asserts legal ownership and safeguards its intellectual property, allowing it to thrive in the market and provide valuable solutions to users.

TECHNICAL SKILLS

Languages: C, C++,Python, Java, Dart, JavaScript, SQL, Bash-Commands
Technologies/Frameworks: Linux/Ubuntu, GitHub, MERN Stack, Full Stack Web Development, Android Development, Firebase, Flutter

ACHEIVEMENTS

- 2k+ followers on Linkedin as a content writer
- 3 star on Codechef
- 100+ downloads on deployed App
- In recognition of the exemplary efforts in developing the software "attainDi," I has been honored with a well-deserved Certificate of Appreciation by College.

CERTIFICATIONS

- 30 days of Google Cloud Challenge - Quicklabs
- DSA - Geeks for Geeks
- Appreciation Certificate from college for developing Software
- Participating in debugging contest held at college
- Complete Web Development Bootcamp
